The facility is still in the RCRA corrective action universe, has a RFA or equivalent, and has a NCAPS prioritization ranking of HIGH. The HIGH ranking would have been based on pre-remediation information - so, because NJDEP has probably been pursuing remediation on the facility under its own State program(s) for a while, in fact it probably now has a lower priority. I can find out definitely if this is important. Bottom line: This is apparently a CERCLIS RCRA deferred ("D") facility.
